EURNEX, the EUropean rail Research Network of EXcellence, has been turned successfully into a self standing legal entity since Nov. 2007.

Represented by the Standing Committee of W. Steinicke, M. Pereira and P. Moos, EURNEX comprises 48 scientific institutes in the area of transport and mobility all over Europe with its high level Advisory Board.

EURNEX is the first research cluster of excellence to underpin the European Research Area in the rail sector.

Driven by operators and industries and supported by the European Commission, EURNEX provides multidisciplinary R&D organised in scientific poles of excellence, pursuing:

Scientific Poles of Excellence
Pole 1  Strategy and Economics
Pole 2  Operation and System Performance
Pole 3  Rolling Stock
Pole 4  Product Qualification Methods
Pole 5  Intelligent Mobility
Pole 6  Safety and Security
Pole 7  Environment and Energy Efficiency
Pole 8  Infrastructure (and Signalling)
Pole 9  Human Factors
Pole 10 Training and Education

• Integration and knowledge sharing throughout EU27
• Providing local based services in the EU member states representing the summarized knowledge of the European rail research community
• Fostering innovative, practical solutions to increase competitiveness of rail transport stakeholders and overall system
• Providing excellent quality of Training & Education by EURNEX EURAIL University, The European Virtual University of Railways

48 universities and research centres
More than 600 researchers
In 561 projects with
About 187 Mio € project volume
